

Project title

Deepening Growth in Committed Churches through Enhanced Congregational Practical Theological Interpretation.

Project Description

This project is a training session on Practical Theological interpretation for 300 leaders in Cap-Haitian, Northern and Hinche, Center department, Haiti. The program will include hands-on workshops that take place in training sessions. These activities are designed to: Help congregational leaders understand theological interpretation in church ministry; apply theories in service methodologically; develop their knowledge and skills to use theology to help Christians grow spiritually.

We want to show leaders how to use the approaches and ideas in Practical Theology to help their congregations. This means teaching them how to apply these methods in a way that's relevant and useful, by helping leaders analyze real-life ministry situations in light of Scripture; design and implement outreach initiatives and write short theological reflections on ministry situations; provide tools for practical theological reflection; and award certificates to participants who complete the program.

Objective

- Train 12 trainers in Practical Theological Interpretation by the end of Month 1
- Establish a learning and exchange forum engaging at 300 congregational leaders by the end of Month 2
- Distribute 600 training manuals and resources on Practical Theological Interpretation to participating leaders
- Improve the growth and ministry effectiveness of participating churches by at least 25%
- Strengthen understanding of Practical Theological Interpretation among congregational leaders.

Target Audience

Congregational leaders, Theological Faculty professors, Theological seminary professors
